DETAILED ACTION

Election of Species

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, as illustrated in Figs. 1a;

Species II, as illustrated in Figs. 1b;

Species III, as illustrated in Figs. 1c;

Species IV, as illustrated in Figs. 2;

Species V, as illustrated in Fig. 3a;

Species VI, as illustrated in Figs. 3b;

Species VII, as illustrated in Figs. 3c;

Species VIII, as illustrated in Figs. 4a;

Species IX, as illustrated in Figs. 4b;

Species X, as illustrated in Figs. 5;

Species XI, as illustrated in Fig. 6;

Species XII, as illustrated in Figs. 7;

Species XIII, as illustrated in Figs. 8;

Species XIV, as illustrated in Figs. 8a;

Species XV, as illustrated in Figs. 9;

Species XVI, as illustrated in Figs. 10; or

Species XVII, as illustrated in Fig. 11.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.
3. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
4. **Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**
5. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
